

Family Centered OB Allows You To...

Have your physician at your birth. Unless out of town, your physician will attend your delivery and does not rely on the on call physician.

Involve your family in your prenatal care.

Personalize your delivery experience with continuous labor support and involvement of your loved ones.

Maintain continuity as you transition from the hospital to home.

Go to one medical home for follow-up care for you, your partner and your children.

Easily communicate with your physician, via online messaging through our patient portal

Obstetrics and well-baby care from the **same physician.**

Two locations to better serve you

Obstetrics from Your Family Physician

Our physicians provide obstetrics that includes prenatal planning, pregnancy care for the mother, delivering babies, and care during the postpartum period. Our physicians believe that the new baby's pediatric care begins during pregnancy, and so we focus on a healthy baby as we partner with mom for a healthy pregnancy and positive birth experience.

Your doctor will address multiple topics during your appointments, such as safe eating and physical exercise, screening tests that you will require, and what to expect during labor and childbirth. During pregnancy, medical checkups and screening tests help keep you and your baby safe. Prenatal appointments also include education and support about how to manage multiple facets of your pregnancy.

A personalized approach to pregnancy and childbirth.

During your pregnancy we work with you to personalize your pregnancy and delivery experience. We will collaborate with your current primary care doctor to ensure continuity during your pregnancy and during the first days of your baby's life.

Collaborative Care

We provide quality, patient-centered care using the most up to date diagnostic testing and technology.

In addition to partnering with your regular physician, we also collaborate with obstetricians and high-risk specialists if complications arise or a C-section is needed.

If you are pregnant or planning to become pregnant, please talk to your primary care physician about scheduling an appointment with one of our providers.
